Objective

Energetic and self-motivated Senior pursuing Bachelor in Computer Science. I am highly motivated with interest in developing innovative software solutions using machine learning. Skilled in building AI models and designing full-stack webapps. Motivated to learn from industry exposure while sharing innovative ideas in an environment that values personal growth.

Education

The University of Texas at Dallas (UTD), Richardson, TX Aug 2022 – May 2026

Major: Computer Science | **Minor:** Business Analytics and Intelligence
Current GPA: 3.62 | Dean's List Scholar
Relevant Coursework: Binary Trees, C++ Fundamentals, Computer Architecture, Database Fundamentals, Data Structures, Digital Circuits, Discrete Mathematics, Java Fundamentals, Linked Lists, Operating Systems, Programming in Unix Environments, Programming Paradigms

Skills

Programming Languages: C/C++, C#, JavaScript, Java, Python, Swift
Frameworks & Libraries: DynamoDB, Django, Flask, Media Pipe, NumPy, Pandas, PyTorch, OpenCV, Scikit-Learn, Tauri, TensorFlow
Web Technologies & Databases: Angular, Bootstrap, CSS, HTML, localStorage, React, Typescript
Developer Tools: AWS Console, Git, GitHub, JSON, MySQL Workbench VS Code, VS Professional

Projects and Work Experience

Software Developer Intern | Tyler Technologies May 2025 – Dec 2025

- Modernized the UI of a public-facing product, enhancing usability and visual consistency
- Built a new UI feature for saving search filters and developed a DynamoDB backend with supporting API endpoints
- Updated the Tyler Authentication system design, configuring it for individual client needs
- Integrated a new component library to streamline UI development across the product
- Developed API endpoints to support both saved filters and model-based frontend actions
- **Technologies Used:** Angular, AWS Console, Bootstrap, C#, DynamoDB, HTML, SCSS, SQL

Task Manager Desktop App | Taskly Jun 2025 – Aug 2025

- Built a cross-platform desktop task manager
- Implemented core features including task creation, editing, deletion, completion toggles, filtering, and persistent storage
- Enhanced UX with due dates, reminders, overdue highlights, and task views
- Added extra functionality such as dark mode toggle, pomodoro timer, progress summary and task imports/exports
- **Technologies Used:** Bootstrap, CSS, Git, HTML, JavaScript, localStorage, Tauri

Student Support Analyst | University of Texas at Dallas Jan 2025 – May 2025

- Provided technical support to university students, faculty, and staff, resolving software, hardware, and account issues

- Handled switchboard redirection and escalated tickets to higher-level IT teams when necessary
- Developed clear, step-by-step guidance, strengthening communication and problem-solving skills

AI Mentee Research Project Sep 2023 – May 2024

- Designed multiple NLP classification models for academic course reviews and ratings.
- Developed AI models for generating end-solutions using transformers.
- Used Media Pipe library to create hand mesh landmarks for hand-tracking and object position.
- Translated live-feed ASL gestures to text (English) using Computer Vision.
- **Technologies Used:** Python, NumPy, React, Flask, TensorFlow, PyTorch, OpenCV, Media Pipe

Tech Support Helpdesk Program (Allen High School) Sep 2021 – May 2022

- Provided troubleshooting and technical assistance to students and staff, resolving issues related to software, hardware, and network connectivity
- Assisted with system updates, password resets, and account management for users
- Developed strong communication skills by delivering clear and concise instructions
- Collaborated with the IT team to implement solutions for recurring issues and improve system performance

Code Ninjas | Programming Coach Jun 2021 – Aug 2021

- Tutored students on the basics of programming concepts using a proprietary Java language.
- Co-ordinated and hosted technology camps and events through the course of the summer.

Organizations and Activities

Artificial Intelligence Society Sep 2022 – Present

- Familiarized with different AI systems and concepts, learned about their function and operation, and became exposed to techniques to create more advanced AI systems.

Cybersecurity Group | Member Sep 2022 – May 2023

- Studying various cybersecurity topics, participating in many interactive workshops, and attending events hosted by industry experts and speakers.
